  - Website Design: Developed and maintained websites with a focus on responsive design.

Sublime Enterprises *— PHP Developer*   **July — September (2023)**
- Worked on server-side development, including:
  - Auto Mailing (Cron Job) : Automated email dispatch system using cron jobs for scheduled tasks.
  - Dashboard Development : Contributed to the development of a user-friendly dashboard for internal tools.

S4DS (Society for Data Science) — *T-Head*   **October (2023)— Present**
- Led the technical team of the Society for Data Science, organising workshops, events, and projects to promote data science education and practical applications
- Provided mentorship and technical guidance to members, fostering collaboration and innovation within the chapter.

Varcsoft — *Full stack Developer Intern*   **March — August (2024)**
- Worked as a Full Stack Developer, developing dynamic websites using Next.js.
- Contributed to various web projects, ensuring responsive design and efficient backend integration.

Varcsoft — *Full stack Developer Intern (Paid)*   **October (2024) — Present**
- Nimai : Developed an Event Management Website with a complete dashboard for both Admin and Vendor management
- Tamayaz : Built a Spa Website, including an Admin Dashboard for managing services, bookings, and customer interactions
- RiserRealty : Developed a Real Estate Website with features for property listing, search functionality,

Projects

ChatBot

For my final year project in my diploma program, I created a chatbot as a Chrome extension. It is capable of answering various queries and offers customisation options for integrating the chatbot into websites. The application was developed using Python and JavaScript.

- Provide answer from web-pages as well as from pdf
- Provide quick interactive chatbot worked in pdf data.(it analyse pdf data and provide answer to queries)
- You can customise this chatbot as per your creativity.

Instagram Automation

I developed an Instagram Automation Tool using Python, Selenium, and customTKinter. With this tool, users can retrieve a text file containing the usernames of followers for a specific account. They can then send messages to these followers, including both text and images.

- Get following count
- Get text file of all following username
- Send images and text message to following account one by one.

Learning Application

I created a mobile application for studying Mobile Application Development (MAD) using Java. It offers interactive features to explore the functionality of various elements, along with detailed documentation and code files (both in Java and XML) for each element, aiding in understanding their workings.

Programming Skills

Languages: C, C++, PHP, SQL, JavaScript, jQuery, Python, HTML, CSS.

Frameworks: CodeIgniter **,** Bootstrap, React JS , Next JS , Express JS , Node JS

Database: MySQL MongoDB.

Achievements & Certifications

Winner in TECHNOTHON 2023 (Vivekanand Education Society's Institute Of Technology)	**30th April 2023**
Runner-up of Inter Collage Project exhibition (V- Technovation)	**12th April 2023**
Intern of then Month (at Vibrt Pvt. Ltd)	**August 2022**
1st Position in the Fourth & Fifth Semester of the IF Department	**2022**
Hackathon 2.O participation certificate (Datta Meghe college of Engineering).	**20 & 21 March 2024**
Coherence 1.O participation certificate (Vidyavardhini's College of Engineering)	**23 & 24 March 2024**
State Level C Programming (Participation Certificate)	**May 2022**
Internal Hackathon for Smart India Hackathon (Participation Certificate)	**April 2022**

Skills

- Teamwork
- Creativity
- Problem Solving

Interests

- Outdoor activities
- Traveling
- Sports

Ongoing Course

- Node Js **Progressing**
